Solar EPC | Rooftop Solar | Utility Scale Solutions

---

- ✓ Subsidy Assistance | ✓ EMI Options |
- ✓ Hassle-Free Installation

At 7 Ray'Solar, we believe solar energy is not just an alternative, it is the future of how homes, businesses, and industries power their growth.

What began as a focused effort to deliver reliable solar installations has evolved into a company trusted for execution quality, transparency, and long-term system performance. Our approach is straightforward: understand real energy requirements, design practical solutions, and execute them with uncompromising standards.

We are building 7 Ray'Solar with one clear objective to make clean energy practical, affordable, and dependable for every customer we serve.

Founder & Ceo - 7 Ray'Solar

## A BRIEF STORY ABOUT THE COMPANY

# About Us

7 Ray'Solar is a solar EPC company providing end-to-end solar solutions for residential, housing societies, commercial, industrial, and ground-mounted projects.

From site survey and system design to installation, commissioning, and maintenance, we take complete responsibility for system performance. Our team combines technical expertise with strong on-ground execution experience to deliver solar systems that perform consistently over their entire lifespan.

We do not sell solar panels.  
We deliver reliable energy solutions.

# VISION

To become a trusted solar energy partner supporting India's transition toward clean, sustainable, and self-reliant power generation.

# MISSION

01

Deliver high-performance solar solutions through smart engineering and disciplined execution.

02

Make solar energy accessible and financially viable for homes, businesses, and industries.

03

Build long-term customer relationships through transparency, reliability, and service excellence.

04

Continuously improve through technology adoption, team training, and process optimisation.

# Key factors

WHAT DEFINES OUR WORK

01

## DESIRE

A strong commitment to clean energy and responsible growth.

02

## RESPONSIBILITY

Strict adherence to safety, quality standards, and regulatory compliance.

03

## RELATIONS

Long-term partnerships with customers, vendors, and installation teams.

04

## CREATIVE

Practical system designs tailored to real site conditions & energy usage.

05

## DEVELOPMENT

Continuous improvement in engineering practices and execution methods.

06

## CONCEPT

Performance-driven solar solutions built for long-term value, not short-term gains.

# PROBLEMS

## A BRIEF STORY ABOUT THE PROBLEMS

Energy challenges must be clearly understood as they form the foundation for designing effective solar solutions. Rising electricity costs and grid dependency impact planning and long-term performance. Without clearly defining these issues, energy solutions can be poorly managed and fail to deliver value.

### The Society

Rising electricity costs and increasing dependence on conventional energy sources.

### The Environment

High carbon emissions and growing pressure on natural resources.

### The Energy Gap

Unreliable grid supply and limited awareness of efficient solar solutions.

# Solutions

## A BRIEF STORY ABOUT THE SOLUTIONS

7 Ray'Solar delivers solar solutions designed around performance, return on investment, and long-term reliability. Each system is engineered using accurate site data, load analysis, and proven components to ensure consistent energy generation under real operating conditions.

## MARKET-DRIVEN DESIGN

Solar systems aligned with actual electricity consumption, roof capacity, and financial objectives.

## EXECUTION-FOCUSED IMPLEMENTATION

Well-planned installation processes supported by experienced teams and strict quality control measures.

## CLOSING THE ENERGY GAP

Reliable solar power that reduces grid dependence and delivers predictable long-term savings.

# OVERVIEW

## A BRIEF STORY ABOUT THE PRODUCT & SERVICES

We provide structured solar EPC services with a single point of coordination, ensuring clear responsibility and smooth execution from planning to commissioning. Our approach simplifies project delivery while maintaining quality and reliability at every stage.

## OUR CORE SERVICES

- Residential rooftop solar installations
- Housing society common area loads
- C&I solar projects
- End-to-end solar EPC execution
- Operation and maintenance services (AMC)
- Solar consultancy and feasibility assessment

## SOLAR ENERGY SOLUTIONS

- High-efficiency solar PV modules
- String and central inverters
- Robust mounting structures designed for site conditions
- Real-time system monitoring
- Grid-connected and hybrid system configurations

# Product Portfolio

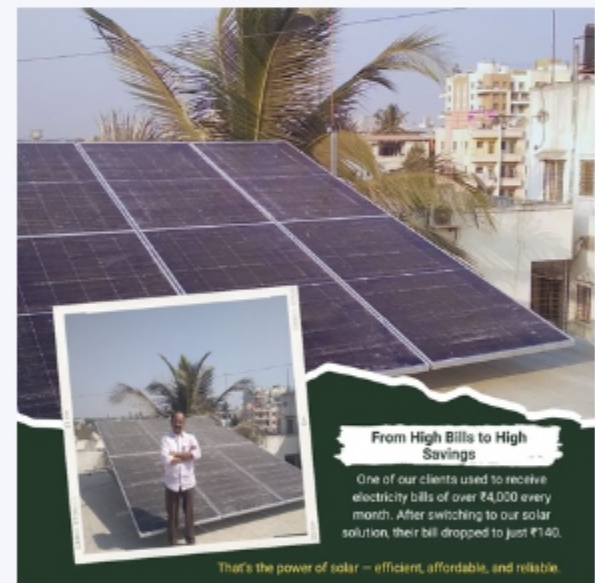

## A STORY ABOUT OUR PORTFOLIO

Our portfolio includes executed solar projects across residential, commercial, industrial, and ground-mounted segments, reflecting our ability to deliver solutions tailored to different site and capacity requirements.

- Dnyandeep Baal Ashram, Dighi – 10 kW
- Deepmaya Automation, Dighi – 14 kW
- Sai Apartment, Katraj – 18 kW
- Sangram Jadhavrao, Wagholi – 10 kW
- Tulip Infinity Planet – 15 kW

Each project reinforces our commitment to quality execution and dependable performance.

# THANK YOU

As we move forward, 7 Ray'Solar aims to expand its project footprint responsibly while continuing to deliver reliable and value-driven solar solutions. Our focus remains on long-term customer satisfaction, system performance, and contribution to a cleaner energy future. Thank you for taking the time to learn about 7 Ray'Solar. We look forward to partnering with you in building a sustainable and energy-efficient tomorrow.
